INTRODUCTION

ABOUT JL INDUSTRIES

Choices and Quality: We offer you the convenience of the full range of products from JL Industries, Samson Products and Thomas Enterprises complete in one catalog.

Here you can find the largest selection of fire extinguisher cabinets in the industry, including steel, stainless steel, aluminum, brass and bronze with a host of optional features. JL's reputation for quality products has made us an industry standard for over 65 years.

Fast Delivery: Take advantage of our Quick-Ship Program for the most popular cabinet models. We ship direct to you from eight locations in North America. See the back page for locations.

LEED Credits: Most of our products can contribute to your LEED project. Contact us or visit our website for more information.

Versatile Manufacturing Capabilities: With the combined resources of our three manufacturing facilities—each with its own specialty—you can create your own distinctive cabinet with the size and features you need, for the look you want. Just Ask Us!

Our involvement with organizations such as the National Fire Prevention Association (NFPA), the Door and Hardware Institute (DHI), the Construction Specifiers Institute (CSI), the Green Building Council and the National Association of Fire Equipment Distributors (NAFED) enables us to remain at the forefront of industry requirements with products to keep you in compliance with current building codes.

Made in U.S.A.: Most products meet the American Recovery and Reinvestment act of 2009 (ARRA), Section 1605 "Buy American". Contact us or visit our website for more information.

Website Resources: Find all of the documentation you need and the most current product information on our website at WWW.JLINDUSTRIES.COM.

WARRANTY

All fire protection products carry a one-year warranty after date of shipment against defects in materials and workmanship. We will replace or repair any product found defective within this period at our discretion. No other warranty express or implied is valid. Fire extinguishers may carry a longer warranty.

AMERICANS WITH DISABILITIES ACT (ADA) GUIDELINES

Look for Model Numbers in Blue to find cabinets that comply with ADAC.

- Cabinets with the number "2" as the fourth character of the model number. These models project only 4" from the wall and include a flush pull.
- All trimless and flat trim models with any handle.
- All 1 1/4", 1 1/2", 2 1/2" or 3" trim models with any handle—excluding bubble cabinets.

Projection Requirements

The federal regulations for ADA Standards for Accessible Design Section: Protruding Objects Section (28 CFR 36, 4.4.1) specify that "objects projecting from walls with their leading edges between 27" and 80" (685 mm and 2030 mm) above the finished floor (AFF) shall protrude no more than 4" (100mm) into walks, halls, corridors, passageways, or aisles. Please note that a surface-mounted cabinet installed in such a way that any part of it falls between 27" and 80" AAF would not meet ADA requirements.

These are national standards which are subject to change by local authorities having jurisdiction. ADA requirements, in particular, are constantly evolving through ongoing legislative and judicial actions. For more information: <http://www.ada.gov>

Mounting Heights

The NFPA and ADA have created guidelines for the mounting of cabinets and extinguishers to provide safety and/or easy access to the equipment. ADA guidelines specify reach ranges for building occupants who require access to equipment such as fire extinguishers and other fire safety devices. According to the ADA Standards (28 CFR 36, 4.2.5 and 4.2.6 neither the extinguisher handle nor the cabinet handle can be mounted higher than 48" AFF for applications which allow for only a forward approach in a wheelchair to the object; and, no higher than 54" AFF, for those applications which allow for a parallel approach. It should be noted that these restrictions also fall within the current National Fire Protection Association (NFPA) guidelines, which call for a maximum mounting height of 60" AFF to the top of the extinguisher.

ADA MOUNTING HEIGHTS

SAF-T-LOK™ OPTION

Unique design for cabinets with cylinder locks

Theft-deterrent feature with cylinder lock
In the panic of a fire emergency, the breaking of the glass in a fire extinguisher cabinet door can be dangerous. It creates the possibility of injury to people and serious liability to the building owner.

Cabinets with a **SAF-T-LOK™** lock appear to be locked and in fact are, but the door can be opened with a sharp pull which breaks the replaceable plastic cam. This deters theft and vandalism which occur from unlocked cabinets and allows quick access to the extinguisher.

The **SAF-T-LOK™** cam lock is centered top to bottom and can be installed on most door styles with the glazing option you select. Recessed pulls are centered top to bottom, and protruding pulls are installed 3-5/8" inches higher when a **SAF-T-LOK™** is installed in your cabinet.

1038Q43

FIRE-FX™ OPTION

Fire Rated Cabinets

AN INDUSTRY FIRST!

Warnock Hersey has certified and listed JL's **FIRE-FX™** Option for 1-hour and 2-hour combustible and non-combustible wall systems. All JL Industries fire equipment cabinets with **FIRE-FX™** Option are shown in red throughout our catalog.

FIRE-FX™ OPTION

- Eliminates the Need to Line the Wall Opening with Fire-Rated Material.
- Retains the Integrity of the Fire Barrier.
- Conforms to ASTM-E814-83 and UBC-43-6
- WHI Test # 631-021201 & 631-021202

Most Recessed Cabinets in our Product Line are Available as Fire-Rated Cabinets. See Product Page in This Catalog for More Information.

To order or specify, add **FIRE-FX™** Option to the end of the seven-digit JL model number. For example, if you want an Ambassador 1017F10 with the **FIRE-FX™** Option, ask for the 1017F10FX.

FIRE EXTINGUISHERS

COSMIC EXTINGUISHERS: Multi-Purpose Chemical

General Data: These units contain specially fluidized and siliconized mono ammonium phosphate powder, which smothers and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

CLASS A,B,C Fires

GALAXY EXTINGUISHERS: Regular Dry Chemical

General Data: These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge pull pin and upright squeeze grip.

CLASS B,C Fires

SATURN EXTINGUISHERS: Class K Wet Chemical

General Data: These units are ideal for commercial restaurant applications as a portable supplement to pre-engineered suppression systems. A low "pH" potassium acetate solution is discharged in a fine mist that provides excellent range while preventing splashing and creating an effective saponification foam-type blanket necessary for suppressing liquid cooking media fires.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out.

Construction: Stainless steel cylinder with protective nozzle tip orifice seal and non-metallic nozzle tip finger guard. Industry standard horn and nozzle design. Name plate shows only the class "K" symbol.

CLASS K Fires

MERCURY EXTINGUISHERS: Halotron®

General Data: This model contains the clean extinguishing agent Halotron® 1, which is EPA-approved, government-accepted and specified. This agent discharges as a liquid, then quickly evaporates, leaving no residue to clean up afterwards. U.S. FAA-approved for use in airports. NFFPA-10 rating. Electrically non-conductive.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Temperature range from -40°F to +120°F.

Construction: Drawn steel cylinder with steel siphon tubes, power cone discharge stream, upright squeeze grip visual pressure gauge and corrosion-resistant paint finish.

CLASS A,B,C Fires

SENTINEL EXTINGUISHERS: Carbon Dioxide

General Data: This extinguisher contains liquid carbon dioxide under pressure.

Operation: Squeeze the lever, which opens the valve, allowing the carbon dioxide to be forced out. The discharge, which changes into a gas and appears as a smothering cloud of white snow, is then directed to the fire through a funnel-shaped horn. Electrically non-conductive.

Construction: Lightweight, high-pressure, aluminum cylinder with O-ring seal and straight thread brass valve fits all sizes. The Sentinel is absolutely rust-free and up to 30% lighter than CO2 units with steel cylinders.

CLASS B,C Fires

272: Water Mist for Electrical

General Data: This non-toxic water mist extinguisher is ideal for Class A fires and where a potential Class C (electrical) hazard exists. Units shipped empty.

Operation: The unique misting nozzle provides safety from electrical shock, making this extinguisher ideal for use in telecommunications and cleanroom environments.

Construction: Non-magnetic cylinder and misting nozzle. For use in medical facilities.

Class A,C Fires

GRENADIER EXTINGUISHERS: Pressurized Water

General Data: The "water press" extinguisher contains water and compressed air. Units shipped empty.

Operation: Squeeze the lever, which opens the valve, allowing the water to be forced out. Upright squeeze grip operation.

Construction: Butt-welded 304-L stainless steel cylinder (eliminates all internal and external crevices). Rugged stainless steel discharge lever and fixed carry handle with visual pressure gauge, pull pin. Heavy-duty, brass, chrome-plated valve body with replaceable molded valve stem seal. UL labeled chemical engine hose.

CLASS A Fires

CLASS A FIRES - PAPER, WOOD, CLOTH, ETC., WHERE QUENCHING BY WATER OR INSULATING BY DRY CHEMICAL IS EFFECTIVE.

CLASS B FIRES - FLAMMABLE LIQUIDS WHERE SMOTHERING ACTION IS REQUIRED.

CLASS C FIRES - LIVE ELECTRICAL EQUIPMENT WHERE THE NON-CONDUCTIVITY OF EXTINGUISHANT IS VITAL.

CLASS K FIRES CALL JI INDUSTRIES FOR MORE INFORMATION.

495: Wheeled Multi-Purpose Chemical 50-lb Unit

General Data: Portable, large-capacity extinguisher units contain specially-fluidized and siliconized mono ammonium phosphate powder which smothers and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish.

CLASS A,B,C Fires

496: Wheeled Dry Chemical 50-lb Unit

General Data: These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C).

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge, pull pin and upright squeeze grip.

CLASS B,C Fires

MODELS 495 and 496 WHEELED EXTINGUISHER

WHEELED EXTINGUISHER FEATURES: The carriage design protects the agent cylinder while providing a platform to transport and operate the units. 25' Foot hose included. Options include stationary design and tow loop.

Other types of wheeled fire extinguishers are available including carbon dioxide unit and nitrogen cylinder-operated units. Please contact JL Industries for further details.

FIRE EXTINGUISHER CABINETS

PANORAMA SERIES: Frameless Acrylic Door

Door and Trim Construction: The Panorama features a frameless acrylic door of clear or opaque textured acrylic. The "stippled" texture of the opaque doors and exclusive aluminum backing protect the lettering, which is available in 3 colors and configurations. Clear doors also available. Flush cabinet doors are attached by a continuous hinge and equipped with zinc-plated handle and roller catch. Trim is cold rolled steel with white powder-coat, clear anodized aluminum, or #4 stainless steel.

Trim Style and Depth: Recessed - 3/8" flat trim or trimless. Semi-Recessed - 1 1/4", 1 1/2" Square Edge or 2 1/2", 3", 4" (recessed pull), 4 1/2" Rolled Edge. Surface-mount has a square edge or optional rolled edge for steel or stainless steel upon request. 1 3/4" face trim on frame. See page 6.

Tub: Constructed of cold rolled steel with white powder-coat finish standard.

Fire-Rated Option Available: Yes

FIRE EXTINGUISHER CABINETS

DECORLINE SERIES: Economy Steel or Aluminum

The Decorline Series offers an Economical Solution for Interior or Exterior Applications. Select from a wide range of sizes that will fit most 2-1/2-10 lb extinguishers. Choose from 2-1/2", or 4-1/4" Trim or a Surface-mounted Design.

Construction: Cold rolled steel tub with white or gray hammertone powder-coat finish, or aluminum.

Trim: Models with trim feature 2" wide trim in either 2.5" or 4.25" depth, depending on model.

Door: Models with "AN" designation have slide in acrylic front secured by clips and tab for lock at top. All other models have door with continuous hinges and either solid door or door with acrylic window.

Fire-rated Option: No

Options at Additional Cost: Brass or Abus Padlock for "AN" models. Optional colors - See page 24. Wall signs and labels - See page 21.

EMERGENCY SPECIALTIES

FREESTANDING AED CABINET STAND: 1480 SERIES

This Decorative Stand with a Surface-Mount Steel or Aluminum Cabinet can be an Attractive Addition to a Building's Décor by Coordinating Finishes and Paint Colors.

Construction: 52" structural steel tubing and steel baseplate. White epoxy or silver metallic finish standard, with custom colors also available.

DUAL CABINET FOR AED AND EMERGENCY OXYGEN: OLYMPUS 1900 SERIES

Provide More Lifesaving Equipment by Including Emergency Oxygen with Your AED.

Door & Trim Construction: CRS with white powder-coat finish, #4 stainless steel or clear anodized aluminum. 1-3/4" trim on face and door, mounted in a 5/8" door stop and attached by a continuous hinge. All models feature a clear acrylic window with graphics, zinc-plated handle and roller catch.

1913F12

Trim Style & Depth: Surface-mount has a square edge. Recessed – 3/8" flat trim, Semi-Recessed – 1-1/2" square edge or 3" rolled edge.

Alarm: 85 db Commander (audible) alarm standard.

Oxygen: Accommodates up to "D" size cylinder. Available with patented T⁰2 oxygen system that features easy-to use automatic flow system.

Tub: White powder coated CRS. Fire-rated option available.

WEATHER-RESISTANT AED CABINETS: 1499 SERIES

Protect Your AED From Moisture and Dust with this Durable Surface-Mount Cabinet.

Construction: Molded UV-Inhibited ABS white Korad™ with fully-gasketed door and clear acrylic window with graphics. Includes exterior-grade handle with lockable latch and stainless steel hinges.

AUTOMATED EXTERNAL DEFIBRILLATORS: LS-AED SERIES

All Defibrillators Meet Local and National Standards for Emergency Care in Public Places and are FDA-Approved. JL has Several Models Available Which All Feature Automatic Heartbeat Detection, Require Minimum Training to Operate and Include a Training Video.

AED CABINETS TO FIT MOST BRANDS: 1400 LIFESTART SERIES

1436

Designed to Accommodate Most AED's on the Market Today.

Door & Trim Construction: CRS with white powder-coat finish, #4 stainless steel or clear anodized aluminum. 1-3/4" trim on face. Formed door with 1-3/4" trim, mounted in a 5/8" door stop with zinc-plated handle and roller catch and continuous hinge. View AED through a clear acrylic window with graphics.

Trim Style & Depth: Surface-mount has a square edge. Recessed – 3/8" flat trim, Semi-Recessed – 1-1/2" square edge or 3" rolled edge.

Alarm: 85 db Commander (audible) alarm standard.

Tub: White powder-coated CRS. Fire-rated available.

METAL AED CABINET OPTIONS AND ACCESSORIES

- Siren Strobe Alarm and 85 db Alarm (9V battery) (SA)
- Alarm Connectivity Switch: Magnetic Door contact (14MAG) or Roller Reed Contact (14RR).

FIRE BLANKETS AND CABINETS

Fire Blankets & Cabinet: Royal fire blanket cabinets come in two basic designs. The Royal **9519S21** is a roller type for emergency use. The enclosed blanket is attached to the vertical roller and comes with arm loops to enable a person to wrap themselves in the blanket in one continuous motion. The Royal **9613S21** is a handy "drop" type with folded blanket. Both units are surface mounted. Each comes with a nominal 62" x 84", 3 1/2 pound, processed wool fire blanket, which meets the Flammable Fabrics Act: Flammability of Clothing Textiles, Title 16, CFR1610.

9613S21

9519S21

Blanket & Extinguisher Combination Cabinet

Door & Trim Construction: CRS with white powder-coat finish, clear anodized aluminum or #4 stainless steel. Flush cabinet doors with a 5/8" door stop are attached by a continuous hinge and equipped with zinc-plated handle and roller catch. Full glass front with pull handle.

Trim Style & Depth: Recessed - 3/8" flat trim, Semi-recessed - 1-1/2" square trim, 2-1/2", 4" or 4-1/2" rolled edge, Surface-Mounted - square edge. 1-3/4" face trim on frame and doors.

Tub: CRS with white powder coat finish standard. Surface-mounted models have clear anodized aluminum tubs.

Glazing: Full front glazing .09 Acrylic.

Shelf: Shelf is located 9" from the top of the cabinet, providing storage of the blanket above the extinguisher.

Blanket: Each cabinet includes a nominal 62" x 84" x 3-1/2 lb, processed wool fire blanket which meets the Flammable Fabrics Act: Flammability of Clothing Textiles, Title 16, CFR21610.

The Activar Construction Products Group (ACPG) is a dynamic group of 5 companies that combine resources, innovation and experience to serve the commercial construction industry. For over 60 years, JL Industries, Samson Products and Thomas Enterprises have manufactured and distributed some of the leading lines of fire protection products including a full line of fire extinguishers and cabinets, AEDs and cabinets plus valve and hose cabinets. They also offer rated and non-rated access panels, roof accessories, corner guards, detention products and entrance floor mats & gratings. Air Louvers offers a wide variety of metal vision lites & louvers, specialized glass, astragals, and metal edging for both wood and hollow metal doors. Hiawatha Inc. has provided high-quality architectural door hardware and components for over 50 years. We now have 5 warehouses with next day shipping in Chicago IL; Lancaster, PA; Dallas, TX; Atlanta, GA; and Seattle WA. Our three manufacturing locations in California and Minnesota and Florida also offer a full range of products, custom manufacturing and quick ship programs for our most popular products.
