

InPro Decorative Surfaces

Shower Bases

Available in numerous colors, shower bases are easily customizable to fit size and drain placement needs. Featuring textured surface to reduce risk of slips and falls, shower bases are also available with an ADA compliant front transitional edge. p.246

Vanity & Counter Tops
Aesthetically pleasing and exceedingly functional, InPro Decorative surfaces are the ideal surfacing solution for Vanity and Counter Top applications. BioPrism™ solid surface is NSF-51 approved. p.258

Shower & Tub Surrounds

Create an easy-to-maintain shower or bath system using InPro Decorative Surfaces. Non-porous, these surrounds will not promote the growth of mold, mildew, or bacteria. p.250

Decorative Panels
InPro Decorative Panels add a more custom look to vertical applications. Made from BioPrism™ solid surfaces, these panels are durable, easy to maintain and environmentally friendly. Ideal applications include wainscoting, shower and bath surrounds, backsplashes and more! p.252

Grab Bars

Reduce the risk of injury in bathrooms with grab bars and safety supports. With an in-depth offering including multiple sizes, angles and colors, there is a solution to accommodate your project's need. p.255

Wall Base

Ideal for high traffic areas, BioPrism™ solid surface wall base has been tested to withstand even the harshest commercial environments. p.253

Window Sills & Decorative Trim

Moisture resistant and visually appealing, BioPrism™ solid surface window sills are durable and easy to maintain.

Available in two standard profiles, BioPrism™ solid surface decorative trim is ideal as an accent piece, chair rail or crown molding. p.253

What is BioPrism™?

| SOLID SURFACE |

BioPrism™ Solid Surface is an environmentally friendly material. It is renewable and easily repaired, offering low maintenance and easy cleaning. BioPrism is long-lasting, resisting chips, cracks and stains.

- Versatile surface is perfect for a number of applications including bathrooms, corridors, food service areas, reception areas and clean rooms
- Surface is easy to clean, non-porous and does not promote the growth of mold, mildew or bacteria
- Contains a proprietary blend of acrylic and polyester resins, specially formulated for commercial environments offering the highest level of chemical resistance in a decorative surface
- Independently tested to withstand greater impact resistance than leading brands (izod impact, notched test)
- All colors available in ¼", and ½" thicknesses; custom sheet sizes available up to 48" x 144" (see p.52)
- Meets National Sanitation Foundation (NSF)/ANSI Standard 51
- Backed by a 10-year limited product warranty
- Class 1A Fire Rating
- Izod impact strength is an ASTM standard method of determining impact strength. A notched sample is generally used to determine impact strength. A higher number indicates greater impact strength. BioPrism solid surface has received a score of .36.

BioPrism Solid Surface contains **resins** which are formulated using **recycled and renewable raw materials**.

Learn more about BioPrism Sheet Optimization to lower costs and reduce waste on p.263

What is Lippert®?

| CULTURED MARBLE |

- Best utilized in bathroom applications as vanity tops, shower/tub surrounds, and wall panels
- Hand-crafted and hand-veined quality for over 40 years
- One of the largest selection of cultured marble colors in the industry to allow for design flexibility
- Standard gloss finish enables the pattern to shine
- Optional satin finish gives the appearance of a solid surface product
- Tested and certified per ANSI standards to ensure product longevity
- Backed by a 10-year residential limited product warranty (1 year for crazing), 5-year limited product warranty for commercial use
- Made in the USA!

Add elegance to any décor with Lippert® Cultured marble.

Hand-crafted and hand-veined for over 40 years. Lippert has one of the largest color selections in one industry.

Surfaces

Wall Panel System

| BIOPRISM™ SOLID SURFACE |

Create a **continual appearance** using available accessories.

- Non-porous BioPrism panels create sterile surgical suites and exam rooms or decorative, clean and protective wall cladding
- Coordinate interiors with Solid Surface colors (p. 266 *1/4" preferred for wall panels*)
- Provide a continual appearance with available accessories including corner molding, batten strips and perimeter trim
- Add a decorative element by incorporating shapes or logos in the wall panels

Why Choose BioPrism Wall Panels?

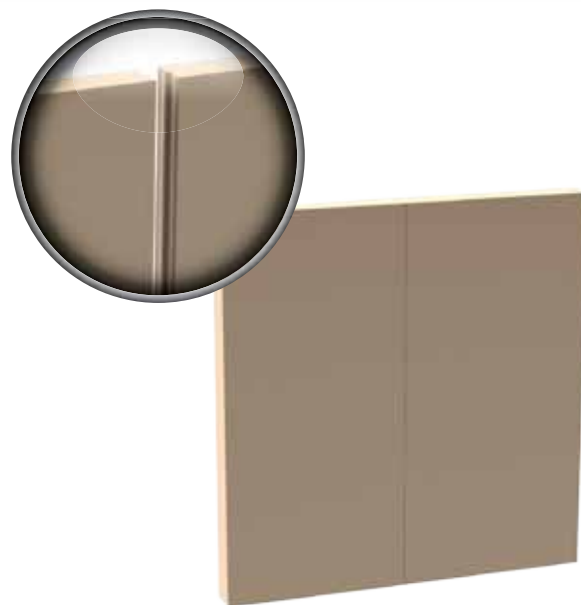

- Custom sheet sizes: Up to 48" x 144"
- Fewer field seams reduce installation time, cost and waste
- Sheet thickness: all colors available in 1/4", and 1/2" in matte, semi-gloss or gloss finishes
- Optimized sheet sizes are delivered manufacturer-direct to project

Standard Sizes

Thickness: 1/4", 1/2"
Widths: 30", 36", 48"
Lengths: 6', 8', 10', 12'

Wavy Edge

Request a wavy edge on your next wall panel order. This unique s-curve edge creates a flush seam as two panels are brought together. The complementary curves fit together to maintain a flat seam where the wall may fluctuate.

Vertical Wall Panels

| BIOPRISM™ SOLID SURFACE |

A. Large Trim: Create a decorative element, by adding trim to complement the rest of your décor

E. Batten Strip: Strengthen and cover wall panel seams with a decorative look

B. Beadboard: Extend our popular pattern from our vinyl wall products, now also available on our solid surface

F. Small trim: Insert a decorative element with this architectural trim used as a panel cap, or framework for any wall panel

C. Wall Base: Protect walls from scuffing by completing the area where the floor and wall meet with BioPrism Solid Surface material

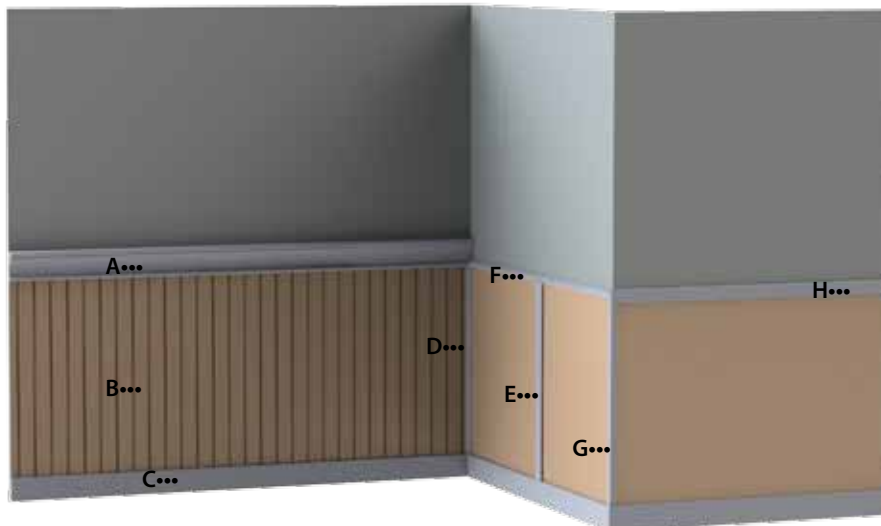

G. Outside Corner: Reinforce your corners with an impact resistant solid surface. Choose the same color or a complementary color to highlight the corner

D. Inside Corner: Provide extra protection and a smooth transition where walls and corners meet

H. Panel Molding: Add a thicker picture-frame style edge to any wall panel

Shower Bases

| BIOPRISM™ SOLID SURFACE |

Custom designed
to fit your needs.

**ADA
Compliant**

Non-skid surface helps prevent
slips and falls

- Solid pour of non-porous, homogeneous material. Solid surface throughout makes the receptor stronger for commercial use verses less substantial, traditional receptors that are backfilled with foam
- Custom entryway options. Select from a standard beveled transitional edge, curb design or flush roll-in for ADA-compliant showers
- Custom made to fit your size requirements and drain location at no extra cost. Also choose a custom sized drain hole – sizes can meet InPro drain standards or accommodate another manufacturer's drain
- Select your desired water barrier height
- Includes an Oatey® brand drain in chrome finish

Custom Curb and Drain Locations

NEW! BioPrism™ Duo-Tone Shower Base

- Define transitional edge with the use of contrasting threshold color to aid sight-impaired or bariatric patients
- Comprehensive color offering allows for easy incorporation into project design
- Contrasting threshold is integrally bonded to solid surface shower base to create a durable, easy-to-maintain surface
- Available edge options include standard curb edge or ADA compliant beveled transitional edge
- Integral water barrier prevents water seepage behind or under shower receptor
- Non-skid, textured surface helps prevent slips and falls-the coefficient of friction tops the competition

2,400lbs

BioPrism Solid Surface shower bases have passed the ANSI Z124.1.2-2005 test where the fixture being tested is subjected to loads in excess of 300 pounds. In fact, the BioPrism shower base under this test, had reached almost 2,400 pounds!

Sheet Stock & Optimization

| BIOPRISM™ SOLID SURFACE |

BioPrism™ Solid Surface

- Manufacturer-direct BioPrism Solid Surface sheets up to 48" x 144"
- Optimized sheet sizes reduce installation and labor costs for wall-cladding by covering more square footage per panel. Minimizing waste/scrap reduces not only project costs, and overhead costs
- Available in all colors in 1/4", and 1/2" thickness in matte/satin, semi-gloss or gloss finishes
- Optimized sheets are delivered manufacturer-direct to site and are wrapped in protective plastic for increased protection during transit (optional)

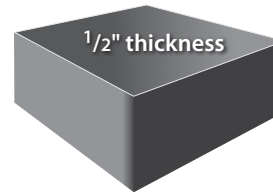

Standard Sizes:

1/4" thickness

- 144" (12') x 30", 36", 48"
- 120" (10') x 30", 36", 48"
- 96" (8') x 30", 36", 48"
- 72" (6') x 30", 36", 48"

Can seam panels for additional width

1/2" thickness

- 144" (12') x 30", 36", 48"
- 120" (10') x 30", 36", 48"
- 96" (8') x 30", 36", 48"
- 72" (6') x 30", 36", 48"

InPro will optimize your decorative surface needs with:

- Two thicknesses: 1/4", 1/2"
- Four lengths: 6', 8', 10', 12'
- Three widths: 30", 36", 48"
- All thicknesses, lengths and widths available in the complete BioPrism Solid Surface color palette!

Quick Ship Sheet!

36" x 144" x 1/2" and 48" x 96" x 1/4"
Max Quantity 5
Select colors available see p.52

Advantages of Sheet Optimization

- Less square footage of material purchased
- Custom sized sheets for your specific project
- Lower freight charges
- Optimized square footage per panel means less weight to ship
- Reduced labor costs
- Optimized square footage per panel means fewer field seams
- Covers more square footage faster, reducing installation cost & time
- Reducing scrap minimizes the impact of product waste on the environment, and lower refuse collection costs

Most Solid Surface products have a limited color offering depending on sheet size and thickness.

BioPrism™ Solid Surface stands apart from the competition by offering all colors in every sheet size and thickness.

Scratch & Stain Resistance

- BioPrism™ Solid Surface contains a proprietary blend of acrylic, polyester bio-resins, specially formulated for commercial environments offering the highest level of chemical resistance in a decorative surface
- Independently tested to withstand greater impact resistance than leading brands (izod impact, notched test)
- Factory finish on BioPrism solid colors is matte/satin for lighter colors, semi-gloss and all darker colors.

- Reagents listed clockwise, beginning at top, were placed on product for 24 hours

- Sand with:
 - 60 micron paper
 - Scotch-Brite™ #7447 Maroon, Very Fine pad

- Scrubbed with water and Scotch-Brite™ #7447 Maroon, Very Fine pad

- Finish with:
 - Scotch-Brite™ #7448 Gray, Ultra Fine pad

Elapsed time: 47 seconds

- Dry with a paper towel

Elapsed time: 58 seconds

SOLID SURFACE VS. LAMINATE CONCERNS ABOUT BACTERIA AND MOLD GROWTH

SOLID SURFACE Does not promote the growth of mold, mildew or bacteria.

Integral bowl

Virtually seamless surface

Non-porous

LAMINATE Areas where bacteria may be found:

Sink Rims

Surface Seams

Delaminated, chipped or cracks in the laminate

Custom Fabrication

| BIOPRISM™ SOLID SURFACE |

BioPrism™ Solid Surface

- In conference rooms or dining areas, BioPrism tabletops combine a striking appearance with durability
- Incorporating BioPrism into a reception counter or nurse's station helps create an inviting, hygienic environment
- Create distinctive restrooms with solid surface panels
- Custom color available to match your existing decor. Or, engrave an attractive inlay or logo for a truly unique look
- All standard colors available in ¼", and ½" thicknesses; custom sheet sizes available up to 48" x 144". See p.263 for details on the BioPrism Solid Surface Sheet Optimization program!

Customize your Environment with a logo

Fabricator Training

| BIOPRISM™ SOLID SURFACE |

InPro provides in-house training to fabricators hand-selected based upon their commercial competence and market reputation. Fabricators attend a 2-day session held at the InPro solid surface manufacturing plant in New Berlin, Wisconsin. There, InPro equips them with the knowledge needed to transform BioPrism Solid Surface into fabricated products. Fabricators enjoy a wide range of benefits including a world-class sales support team, no distributor markup, and an estimating department to calculate the optimal quantity and sheet size for your job, thereby, limiting sheet waste and cost. Call InPro today to see how you can become part of the InPro fabricator network.

"Thanks so much for the wonderful training class on 'solid surfaces.' It was a great learning experience. [We] were pleased with the training. I would like to have a sample set of all of the colors sent to me. I am ready to try this product on a reception station that we're building now."

- Roy W. LeNeave Sr., Vice President - Engineering

Color Palettes

BioPrism™ Solid Surface

With an extensive color palette, InPro Decorative Surfaces has colors to complement your interior. Custom colors available for BioPrism Solid Surface; setup charges and minimum quantities apply.

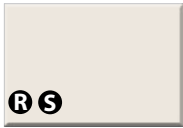

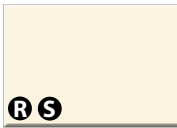

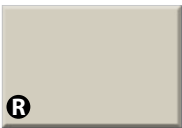

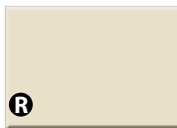

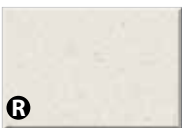

Available as signage, countertops, vanity tops, shower walls, tub surrounds, tub decks, window sills, wall panels, conference tables, and flat stock. The standard finish on light colors is satin while the finish on dark colors is semi-gloss. All colors available in 1/4", and 1/2" thickness.
